# NORTHAMPTON STATE HOSPITAL

Post Office Address: Northampton, Mass.

## BOARD OF TRUSTEES

JOHN C. O'BRIEN, M.D., *Chairman*, Greenfield, Mass.  
MRS. EMILY N. NEWTON, *Secretary*, Wellesley Hills, Mass.  
LAURENCE D. CHAPIN, M.D., Springfield, Mass.  
ALBERT M. DARLING, Sunderland, Mass.  
MRS. JESSIE BASSETT, Northampton, Mass.  
MRS. ANNE HEFFERNAN, Northampton, Mass.  
SAMUEL MICHELMAN, Northampton, Mass.

## OFFICERS OF THE HOSPITAL

ARTHUR N. BALL, M.D., *Superintendent*  
GUY C. RANDALL, M.D., *Assistant Superintendent*  
B. EDWIN ZAWACKI, M.D., *Senior Physician, Chief of Male Service*  
FERNAND LONGPRE, M. D., *Senior Physician, Chief of Female Service*  
ELIZABETH KUNDERT, M.D., *Senior Physician, Chief of Out-Patient Service*  
RHODA U. MUSGRAVE, M. D., *Senior Physician*  
RUTH THOMPSON CROSSFIELD, M.D., *Assistant Physician*  
KENDALL B. CROSSFIELD, M.D., *Assistant Physician*  
RUTH PARKER, M.D., *Assistant Physician*  
HENRY R. CRAIG, M.D., *Assistant Physician*  
LUCIEN H. HARRIS, D.D.S., *Dentist*  
FRANK W. SMITH, *Steward*  
EVA L. GRAVES, *Treasurer*

## HEADS OF DEPARTMENTS

LEE W. SINCLAIR, *Chief Power Plant Engineer*  
HARRY M. LEE, B.S., *Head Farmer*  
RHODA SMITH, B.S., *Psychiatric Social Worker*  
GEORGE W. PARESEAU, Ph.G., *Pharmacist*  
ALICE E. BEDELL, R.N., *Principal of School of Nursing*  
PEARL E. BEATON, *Head Occupational Therapist*  
ANNA G. ROGERS, *Dietitian*  
CATHERINE BARDWELL, *Head Housekeeper*  
JOHN M. GREGG, *Chief Male Supervisor*

## CONSULTING PHYSICIANS

THOMAS F. CORRIDEN, M.D., *Surgeon*  
STEPHEN BROWN, M.D., *Internist*  
FRANK E. DOW, M.D., *Ophthalmologist*  
JOSEPH D. COLLINS, M.D., *Oto-Laryngologist*  
MICHAEL E. COONEY, M.D., *Roentgenologist*  
NELSON A. HATT, M.D., *Orthopedist*

## TRUSTEES' REPORT

*To His Excellency, the Governor of the Commonwealth and the Honorable Council:*

The Trustees of the Northampton State Hospital respectfully submit herewith their report for the year ending November 30, 1935, including the report of the Superintendent covering the same period.

Meetings of the Board are being held on the second Thursday of each month, with very good attendance. Two members of the Board are appointed at the monthly meetings to make an inspection of the entire plant and report findings to the full Board at the subsequent meeting. This gives plenty of time during the monthly interval for inspection and opportunity for a more detailed report.

Five major P. W. A. building projects have been in progress during the year. The new heating plant on Earl Street near the railway siding has been completed and was put into operation June 12, 1935. The entire heat and hot water supply for the institution is derived directly and indirectly from this plant, the steam mains being carried in tunnels that are mostly available for subway travel as well. This new heating plant eliminates the necessity for a half mile haul of coal to the old power house. A unit to accommodate one-hundred and fifty female patients is

being added to the new group of ward buildings on the south side of Prince Street. It should be ready for occupancy before next spring. A new cafeteria with a feeding capacity of one thousand patients is being built near, but detached from, this ward building. It will accommodate all the patients in the new group of ward buildings when completed and should be ready for use soon. A new laundry on Earl Street near the heating plant is nearly completed but will probably not be equipped and ready for use before spring. Additions to and remodeling of the farm ward into a storehouse and cold storage have been started and is progressing satisfactorily.

Each of the items of new construction listed above fill a long felt want and were urgently needed to relieve "growing pains". However, there are several other imperative construction needs at this hospital. The most important of these is a new kitchen and congregate diningroom to serve the main hospital building. The kitchen that prepares food for nearly two thousand and three hundred people (patients and employees) is no larger now than when it served less than half the present number. So limited is the space and equipment in our kitchen that it is necessary to start frying fish three hours before it is served to the patients. This is but one example of many that might be given of our serious lack of kitchen facilities. Add to this the fact that the patients in the main hospital are fed in twenty-five separate diningrooms, all of them overcrowded and many over-flowing into day space, and you find a condition that shows little or no improvement over the old time asylum. Our assembly room seats about five hundred patients and does not allow more than half of those desiring and able to attend religious services and entertainments to do so. There is at this hospital no clinical laboratory worthy of the name. Our present laboratory set-up could be duplicated in the office of almost any country practitioner of medicine. At this writing, plans for a new building to be offered as a P.W.A. project are being made. This project would erect a new building to be used as a kitchen and cafeteria dining-room to serve the main hospital and would include enlargement of the present assembly room. If this project is allowed, a serious handicap to hospital efficiency will have been overcome.

The overcrowding of patients at this hospital is a rather serious matter but this will be relieved, temporarily at least, in the female service with the opening of the new ward building described above. There is at this time no relief in sight for the overcrowding of male patients. Last summer when the work of remodeling the farm ward into a storehouse and cold storage was started, it was necessary to bring the sixty patients housed in the farm ward into the already crowded main wards. We feel very strongly that construction of the two ward buildings planned for men in the new detached group, where cafeteria feeding service will be available shortly, should be started without delay.

The dairy barns and piggeries are old, unsafe and constitute a serious fire hazard. They are located within one hundred feet of the main buildings and should in the near future be razed and new buildings erected on a site more centrally located on the farm about one-half mile distant from the main buildings. Near them should also be erected a small building to house and feed about one-hundred male patients and a few farm employees. The whole to constitute a farm colony.

Other new construction that should be given consideration is the erection of a separate building for noisy and disturbed patients, a building for occupational and industrial therapy and a house for the Superintendent. The quarters at present occupied by the Superintendent could at no great expense be converted into a surgical unit and infirmary the latter to be used for sick employees.

As may be seen from the statistical tables appended hereto, the turnover in patient population at this hospital is now large. We trust that due consideration will be given to requests for increased personnel and minor improvements in the 1936 budget.

It is with deep sorrow that we report the death on February 16, 1935, of Edward W. Whitney, M.D., Superintendent since November 8, 1933. Dr. Whitney had served this hospital faithfully and well over a long period of years, first as assistant physician, later as assistant superintendent and for two periods as acting superintendent.

At a meeting of the Board held April 4, 1935, Arthur N. Ball, M.D., Assistant to the Commissioner of Mental Diseases, was chosen as Superintendent and began his duties in that capacity May 11, 1935.

In the interval between February 16 and May 11, 1935, Guy C. Randall, M.D., Assistant Superintendent, served as Acting Superintendent in a very creditable manner.

We wish to express at this time our appreciation for the excellent cooperation given us by the State Department of Mental Diseases and for the faithful services of the hospital employees.

Respectfully submitted,

JOHN C. O'BRIEN, M.D., *Chairman*  
EMILY N. NEWTON, *Secretary*  
LAURENCE D. CHAPIN, M.D.  
ALBERT M. DARLING

MRS. JESSIE BASSETT  
MRS. ANNE HEFFERNAN  
SAMUEL MICHELMAN  
*Trustees.*

### SUPERINTENDENT'S REPORT

*To the Trustees of the Northampton State Hospital:*

I submit my report for the year 1935.

#### MOVEMENT OF POPULATION

The number of patients on our books October 1, 1934, was 2,070. There were admitted during the year 634 making a total of 2,704 under care and treatment during the year. There were discharged to their relatives and transferred to other institutions 350 patients. One hundred and seventy-six deaths occurred leaving 2,178 patients on the books of this hospital on September 30, 1935, of which 1,878 were actually in the hospital and 300 patients on visit, or otherwise absent.

#### PERSONNEL

During the year the following changes were made in the Medical Staff:

Dr. Fernand Longpre, formerly on the staff at the Taunton State Hospital, was appointed to the position of Assistant Physician on January 1, 1935.

Dr. Edward Whitney, Superintendent, died on February 16, 1935, after a brief illness.

Dr. Arthur N. Ball, became Superintendent on May 11, 1935.

Dr. Henry R. Craig, formerly on the staff at the Worcester State Hospital, was appointed Assistant Physician on November 11, 1935.

#### PSYCHIATRIC SERVICE

All new admissions are brought before either a Staff Meeting or a Staff Conference and the cases considered relative to diagnosis, treatment and disposition. This is done in most cases sometime during the third week of residence. Staff Meetings are held each morning excepting Saturday, Sunday and Holidays at 8:30 A.M. and usually last for one hour. At these Staff Meetings matters pertaining to administration and therapeutics are also discussed. These Staff Meetings are too limited to consider each new admission so only the more important ones are brought before it. All other new admissions are discussed at Staff Conferences presided over usually by the Assistant Superintendent and attended by the physicians on the male service when male patients are considered and by the physicians on the female service when female patients are being considered. There is no regular hour for these Staff Conferences, they are called by the Assistant Superintendent whenever there are a sufficient number of cases to be considered. The Staff Conferences are more informal than the Staff Meetings and the case records are usually reviewed merely in abstract. At both Staff Meetings and Staff Conferences free discussion is encouraged and each staff member is requested to participate in the discussion.

All history records are made as complete as our limited clerical force will permit. Routine progress notes are made semi-annually and physical examinations annually, each physician being given at the beginning of the week a list of patients upon whom he is expected to make and record examinations.

#### MEDICAL SERVICE

During the year M. Gene Black, M.D., has started a study of all the patients in an attempt to discover any unsuspected cases of pulmonary tuberculosis. Dr. Black visits the hospital every second week and is assisted in her fluoroscopic examinations by one physician from the Male Service and one physician from the Female Service. During the short time these examinations have been made several cases of pulmonary tuberculosis, some of them active, have been discovered. This brings up the question of treatment for and isolation of tubercular patients. At the present time we have no wards for tubercular patients but active cases have been segregated in one of the infirmary wards and precautions have been taken in an endeavor to prevent contagion. I would suggest to the Board of Trustees that they consider in the near future some means whereby better isolation of tubercular patients can be had than is at present available. This would, in my opinion, necessitate a separate building devoted to the care of tubercular patients.

The usual vaccination against typhoid fever and smallpox, as before, has been carried out as is the test and immunizations for diphtheria. General medical treatment has been administered whenever necessary.

This hospital has no facilities for major surgery and it is to be hoped that some arrangement can soon be made whereby an operating room and surgical suite can be built and equipped.

#### DENTAL DEPARTMENT

The resident dentist examines the teeth of all new patients soon after their admission to the hospital and gives them what treatment seems best. The following is a summary of the other work done by the dentist during the year besides the general routine examinations: — Fillings, 989; dental plates made or repaired, 57; teeth cleaned 1,255; extractions, 796; treatment of teeth or gums 397; miscellaneous treatments, etc., 35.

#### LABORATORY

Our laboratory facilities are painfully inadequate. Our laboratory space is small and its equipment is almost negligible. During the latter part of the fiscal year just ended some pieces of laboratory apparatus have been bought out of our appropriation for medical and general care. This apparatus includes an up-to-date microtome, incubator, autoclave, blood sugar apparatus and other small pieces of equipment. It is planned to construct an up-to-date laboratory in the building now being planned as a kitchen and central diningroom.

#### SCHOOL FOR PSYCHIATRIC NURSING.

A two year course in psychiatric nursing is being given under the direct supervision of the Principal of School of Nursing, assisted by the members of the medical staff. There were six seniors who graduated last June and at the present time there are in the senior class eight, and nine in the junior class. While this work of training consumes a great deal of valuable time, it is felt to be well worth while. The course given does not qualify the graduates to register, although I am inclined to believe that many of them are as well equipped to do ordinary nursing as the graduates of some general hospitals giving the regular three year course. At any rate the graduates of the psychiatric training school are better equipped to do psychiatric nursing than are the registered graduates of general hospitals.

#### OCCUPATIONAL AND INDUSTRIAL THERAPY

The Occupational Therapy Department has conducted classes in the occupational work room and also on the various wards for patients who are unable to go to the general work room. The following is a list of the articles made in our Occupational Therapy Department: Towels, 6,727; pillow slips, 2,626; face cloths, 290; stand covers, 239; runners, 6; pillows, 83; pillow covers, 2; curtains, 47; valances, 2; sheets, 64; rugs, 26; tie backs, 291; waste baskets, 18; bags, crocheted, 2; pot holders, 10; dresser set, 1; sacks, 2,160; tapes, 3,200; costumes, Dresses, 5; pants, 6; monkey suit, 1; scenery (painted), 1; beans (shelled), 20 bus.

We do not have a recreational director, therefore, the Occupational Therapist has to take charge of the various forms of recreation and entertainments held in our Assembly Hall. During the year there were 118 Church services; 3 lectures; 27 E.R.A. concerts; 31 movies; 1 play; 3 minstrels; 1 dance review; 12 dances; 16 vaudeville shows; 4 parties; 1 Christmas tree exercise; 2 picnics; 1 field day; 19 baseball games; 15 soft-ball games:

The Industrial Therapy Department, which has space inadequate for the size of this hospital, has been busy during the past year. The following is a summary of the work done in this department: Shoes repaired, 1,043; Mattresses made, 726; pillows made, 382; brooms, 30; rugs, 316; jumpers, 176; overalls, 308 pr.; shirts, 466; hydro pillows, 20; canvas mattresses, 41; cushions recovered, 47; chairs, covered, 84; clocks, repaired 6; brushes made, 113; couch recovered, 1; laundry baskets repaired, 43; aluminum ware repaired, 210; forms printed, 52,475.

#### OUT-PATIENT DEPARTMENT

##### *Out-Patient Clinics*

	M.	F.	T.
Patients reporting at clinics . . . . .	87	343	430
Inquiries regarding patients at clinics . . . . .	173	340	513

##### *Consultations*

Referred by:	M.	F.	T.
Social agencies . . . . .	24	53	77
Schools . . . . .	0	1	1
Physicians . . . . .	16	24	40
Relatives . . . . .	10	10	20
Self . . . . .	3	4	7

Making a total of . . . . . 53 92 145

Treatment cases . . . . . 32 46 78

##### *School Clinic*

First examinations . . . . .	238	121	359
Re-examinations. . . . .	144	52	196

Making a total of . . . . . 382 173 555

##### *Court Work*

Total number of Court cases during the year . . . . . 118 47 165

Referred from:	Type of Cases:	
Springfield . . . . . 105	Section 215 . . . . .	149
Pittsfield . . . . . 11	Section 99 . . . . .	2
North Adams . . . . . 7	Unclassified . . . . .	14
Westfield . . . . . 13		
Northampton . . . . . 21		
Great Barrington . . . . . 3		
Lee . . . . . 4		
Greenfield . . . . . 1		

The grand total of all people seen in the Out-patient Department during the year was 1,886; 845 male and 1,041 female.

#### SOCIAL SERVICE DEPARTMENT

The Social Service Department has had the continuous services of two workers during the past year with no volunteer work and no changes in staff.

Miss Rhoda Smith has occupied the position of Senior Psychiatric Social Worker and the junior position has been occupied by Miss Marguerite Mower.

There appears to be a gradual increase in the work of every branch of the Department with the exception of the Child Guidance Clinic work. This branch of service has failed to increase, not because of a lack of demand, but due to a definite time limitation in order that the work in connection with the hospital should be neglected.

There is a tendency toward change in the trend of social service work. Family Care service of boarding patients outside the hospital, helping them to find employment and assisting them to take their place in the community, has been encouraged. As a result, more time has been spent in efforts to locate and in investigating suitable homes as well as supervising patients already in boarding care. The service of trying to establish patients in the community has been much in demand, whether in regard to boarded out patients or patients in the hospital.

Another change, or addition, to our service has been assisting with interviews in the Springfield out-patient clinic. This clinic has been gradually growing in size until the out-patient psychiatrist found it practically impossible to contact, during the allotted time of one afternoon a month, all the patients who came. Since Springfield has a larger number of patients under supervision than any other place in the district, attendance at the out-patient clinic made it possible for the social worker to keep in touch with more patients in this area and at the same time assist the psychiatrist with the clinic work. The work started beginning with September, 1935.

During the year the Social Service Department contributed 143 medical social histories to aid in diagnosis; 419 patients were supervised in their homes; 18 patients under supervision were helped, in some definite way, to adjust themselves in the community; 141 visits to relatives of patients; 34 visits to other persons; 33 visits to social agencies were made in regard to patients undersupervision; 38 special personal services were done for patients in the hospital; information was sent to 9 other hospital or social agencies regarding patients; 39 special investigations were made for patients in the hospital; 8 patients were visited on the ward; employment was obtained for 6 patients; 3 patients were placed in boarding homes and 10 homes were investigated as possible places to board patients.

One day a week has been given strictly to Social Service work in the community. The Northampton and Holyoke Child Guidance Clinics have been supervised by the senior worker. There have been 167 interviews held with teachers, parents, or others concerned with children referred to the clinics; 58 clinics; have been attended; 13 telephone calls and 9 home investigations were made regarding children receiving clinic treatment.

Each year a certain amount of time is devoted to attending educational and professional meetings in order to keep informed on the newer developments of Social Service work. During this year 38 such meetings were attended outside the hospital. In addition, 41 medical staff meetings were attended at the hospital.

#### STEWARD'S DEPARTMENT

This department is concerned principally with the problem of feeding the entire population and clothing the patient population of the hospital. With our antiquated kitchen and diningroom set-up the task of preparing, and particularly of serving meals, is a difficult one. The feeding of patients is carried out in twenty-eight separate diningrooms located at considerable distance from the kitchen. The ward diningrooms themselves are small and few of them are able to accommodate the number of patients in the ward so that it is necessary to set up tables in the hallway in most wards. The kitchen, which was built to serve approximately 700 people, now is obliged to serve more than three times that number. If the new kitchen and diningroom being planned as a W.P.A. project is granted, the condition above mentioned will be eliminated. The proper clothing of the patients has become more and more of a problem during the last two or three years, — this is undoubtedly due to the fact that fewer patients are home furnished because of adverse economic conditions.

The Steward's department also has to purchase or requisition all hospital supplies. This involves a great amount of clerical work as well as planning an estimation of future needs. All laundry work and general housekeeping, under the direct supervision of the Head-housekeeper; the greenhouse and grounds, under the florist and the garage, housing all of the State owned automobiles, are also under the general supervision of the Steward.

#### FARM REPORT

Some of the crops suffered from the drouth, but there is an abundance for the institutional needs. The following are the weights in pounds for some of the major crops: Hay, 600,000; greenfeed, 416,000; apples, 66,000; asparagus, 2,600; beets, 56,200; cauliflower, 2,700; string beans, 25,000; cabbage, 87,000; carrots, 48,500; corn (sweet), 23,200; squash, 14,600; scullions, 7,500; tomatoes, 109,245; cucumbers, 15,800; dandelions, 8,900; lettuce, 3,900; spinach, 8,100; turnips,

68,300; mangels, 52,000; onions, 84,000; parsnips, 20,500; peas, 5,800; potatoes, 86,000; peppers, 1,500; rhubarb, 9,400; strawberries, 9,800 qts.

Of the above amounts 125,000 pounds went to the canning room.

The dairy is in the best condition it has been for several years. The milk production was 623,000 lbs., and we had 10,400 pounds of beef.

From the poultry department we had 10,509 dozen of eggs and 7,800 lbs. of dressed meat.

The swine herd is in good condition with 527 head. During the year we had 91,000 lbs. of dressed pork.

Much time has been devoted during the year to clearing stone from several fields. Over 300 loads of stone were drawn to the stone crusher.

The poultry, swine and dairy buildings are in very poor condition.

#### CONSTRUCTION

During the year much new W. P. A. construction has been carried on. This includes a new Power Plant, serving the entire hospital. It is located on Earl Street near the railroad siding. This plant has been in very satisfactory operation since June. A new building to accommodate one-hundred and fifty women patients is nearly completed and should be ready for occupancy in the spring. A new cafeteria to serve the patients in the new group of buildings on the south side of Prince Street is also nearly completed and should be ready for use in the spring. A new laundry located on Earl Street near the Power Plant is roofed in and should be ready for use in the spring. The remodeling of the old farm ward into a storehouse and cold-storage house was started during the summer and is progressing favorably. The work of renovating the building known as the Braman house is nearly completed and this house should be, within a few months, ready for occupancy by one of the physicians and his family.

Among other work done by the hospital construction force has been the remodeling of the inside of the old horse stable, now used as a garage, so that it would accommodate more cars; the building of a two-car garage of concrete brick construction near the Braman house; the building of two-hundred feet of roadway; the renovation of several offices in the administration building and a great amount of painting in the wards, as well as miscellaneous repair work, which is necessitated because of the age of most of the buildings.

#### ENGINEER'S DEPARTMENT

##### *New Power Plant*

New boiler plant was put into operation, including a new turbine driven fire pump.

##### *Electrical Work*

Replaced electric wiring and fixtures as follows: — 5 offices in Administration building; first floor in South Infirmary; Lower second North diningroom; 3 shower rooms at third halls, North; House No. 17; Diningroom at Lower second North; and the dental office.

Other lighting fixtures were replaced as follows: — Treasurer's office and the corridors of Lower first, North; Lower second, North and North Infirmary.

Installed an electric service cable from new dining hall to four houses on Chapel Street.

Electric service cables were installed between Tunnel E and House No. 1 for service to Houses No. 1, 11, and 12 and the electric service cable to the Nurses' Home and Employees' Home, South was connected to the cables in the attendants' Home by contract with the Interstate Electric Construction Corporation of Springfield., Mass

##### *Plumbing and Steamfitting*

Installed nine new shower stalls at the third halls, North.

Installed a 4-inch C. I. pipe line for main water supply to garage. Also replaced an old water piping in garage basement and installed fire hose on the main floor.

Replaced a bath tub in single tub room at South Infirmary — 1 and connected a hot water controller to same.

Installing plumbing fixtures and piping to same at No. House 17.

Laid new Akron tile from main sewer line in front of garage to garage basement. Salvaged plumbing fixtures, water piping and sprinklers from the Farm Ward building before contractor started to renovate interior of building.

Installed a water closet, lavatory and piping to same in chauffeur's room at garage

Installed a steam heating system in House No. 17.

Installed steam and return lines in concrete box from dining building to houses on Chapel Street.

Steam line to Male Attendants' Home was connected to 8" high pressure steam main in basement of home and old supply line from basement of Employees' Home South was connected for a return main.

Dismantled steam line to old fire pumps.

Replaced a leaky steam heating boiler in House No. 2, West side, with one removed from House No. 13.

Made guards from perforated sheet steel for heating coils in annex at South Infirmary 1 and 2.

Four radiator guards installed in water sections of S.I.I., 2, 3, and 4 by the Wickwire Spencer Company of Worcester, Mass.

Connected domestic water heaters in A.I., B.I., and C.I. through reducing valves to steam supply from new power plant and to steam traps on return line.

OTHER WORK AND REPAIRS

Replaced a broken 3/8" iron wire hoisting cable on counterweight of North Infirmary dumbwaiter.

Recharged all fire extinguishers.

Laundry repairs as follows: — Replaced 60 feet of 3" pipe on main steam line and replaced 50 feet of 1 1/2" pipe on main return line.

Made 105 pieces of new tinware. The following for the kitchen: — 3 covers for gelatin tins and 5 covers for dessert pans.

Repaired 751 pieces of tin and galvanized ware.

To all the officers and employees of the hospital I wish to express my sincere appreciation for their cooperation in caring for the needs of the patients. I am very grateful to the Board of Trustees for their loyal support and their interest in the administration of the Institution.

Respectfully submitted,  
ARTHUR N. BALL, M.D.,  
Superintendent.

PER CAPITA

During the year the average number of patients has been, 1,843.515.  
 Total cost of maintenance, \$559,724.35.  
 Equal to a weekly per capita cost of (52 weeks to year), \$5.8387.  
 Total receipts for the year, \$101,844.16.  
 Equal to a weekly per capita of, \$1.0623.  
 Total net cost of Maintenance for year (Total maintenance less total receipts), \$457,880.19.  
 Net weekly per capita, \$4.7764.

Respectfully submitted,  
 EVA L. GRAVES,

Treasurer.

STATISTICAL TABLES

AS ADOPTED BY THE AMERICAN PSYCHIATRIC ASSOCIATION PRESCRIBED BY THE MASSACHUSETTS DEPARTMENT OF MENTAL DISEASES

TABLE 1. General Information

(Data correct at end of institution year November 30, 1935)

Date of opening as a hospital for mental diseases, August 16, 1858.

Type of hospital: State,

Hospital plant:

Value of hospital property:	
Real estate, including buildings . . . . .	\$2,772,384.96
Personal property . . . . .	233,049.05
Total . . . . .	\$3,005,434.01

Total acreage of hospital property owned, 550.75.

Total acreage under cultivation during previous year, 236.

Officers and employees November 30, 1935:

	Actually in Service at End of Year			Vacancies at End of Year		
	M.	F.	T.	M.	F.	T.
Superintendents . . . . .	1	—	1	—	—	—
Assistant physicians . . . . .	5	4	9	—	—	—
Total physicians . . . . .	6	4	10	—	—	—
Stewards . . . . .	1	—	1	—	—	—
Resident dentists . . . . .	1	—	1	—	—	—
Pharmacists . . . . .	1	—	1	—	—	—
Graduate nurses . . . . .	—	17	17	—	—	—
Other nurses and attendants . . . . .	125	119	244	—	—	—
Occupational therapists . . . . .	1	2	3	—	1	1
Social workers . . . . .	—	2	2	—	—	—
All other officers and employees . . . . .	85	56	141	2	—	2
Total officers and employees . . . . .	220	200	420	2	1	3

Census of Patient Population at end of year (Classification by Diagnosis September 30, 1935):

	Actually in Hospital			Absent from Hospital but still on Books		
	M.	F.	T.	M.	F.	T.
WHITE:						
Insane . . . . .	857	972	1,829	121	173	294
