

Support protestors

I applaud the work of UMass students and their supporters to end CIA recruitment on the UMass campus. The CIA trial comes at a crucial time; we are deeply involved with the terrorist contra forces in Nicaragua, and faced with the possibility of our own troops being sent. We are also in a time of discovering corruption at the highest levels of our government. The CIA has been doing for years what the Reagan Administration has been caught doing only recently: directing foreign policy on their own, running wars and terrorist activities with our money but without our consent.
