Barber Renewals - Yours 5/10/76

You, Frank, were not only given my input well within the time framework you delineated re the Barber renewals but those of other people within the Department as well. Input by me was made to you when you requested it. In fact, you acknowledged same! It is regrettable that you cannot deal with or accept verbal input from me.

I waited as long as I could for your written statement sharing your rationale for the Barber decision, a statement which you promised to the members of the Athletic Department. Since it never materialized and the school year was ending I had to write my memo of 4/23/76 hoping that a decision had not been made. The information in the memo, more or less, had been verbalized to you by me long before March 4, 1976.
